Photography Advise:

People often ask me what camera I use for taking my photos. I carry a [Nikon CoolPix](#) digital camera in my handbag everywhere I go. This is a neat little camera, that is ideal for capturing those unexpected moments. Good Quality shoots, decent zoom but if I go for speed then nothing beats my [Canon 6.3 megapixel](#). The images are outstanding and finally you can capture a smile a movement, an animal moving without having to wait for loading. This camera makes me happy :-) What a joy to use.

Check some of the pure [photo images here](#), I love the spiritual zest photo, that was taken as a large photo and zoomed in it still retains that amazing clarity of detail in the wings of the bee.

You can send some of my favourite photographic images as [FREE E-cards here](#)
